## TENT SIZING CHART

### How to use this chart:

1. Determine how many guests you're planning for your event.
2. Go down the left column and scan across to the right based on the type of party you're having.
3. Add some extra space so people are comfortable, especially if you plan on having bar service, buffet lines, stage etc.
4. Add those numbers up and that will tell you how much total area (sq ft<sup>2</sup>) you need for your function. Depending on your event, you may want to add some extra space or go to the next larger size then what is estimated simply because extra room is always better than not enough.

### How NOT to use this chart:

It's only a basic guide, don't cast these numbers in stone after you determine what amount of space you think you'll need. Each event is slightly different in nature and therefore these numbers should be used as a starting point only. Then, once you flesh out the details a little better, fine tune things depending on what your budget is and your own personal preferences.

### Standard Tent Sizes

Match the following grid to the suggested capacity in square feet and then you can easily determine what size of tent will work best for you.

size	Sq. Ft.
20' x 20'	400
20' x 30'	600
20' x 40'	800
20' x 60'	1200

30' x 30'	900
30' x 60'	1800
30' x 90'	2700

size	Sq. Ft.
40' x 60'	2400
40' x 80'	3200
40' x 100'	4000
40' x 120'	4800
40' x 140'	5600

size	Sq. Ft.
60' x 60'	3600
60' x 80'	4800
60' x 100'	6000
60' x 120'	7200
60' x 140'	8400
60' x 160'	9600
